

•Facial Purifying Cleanser •

With **5 α Avocuta[®]**

Sebo Clean is a clear lotion that transforms into rich foam. It gently removes impurities and sebum excess, thanks to **5 α Avocuta[®]** which regulates seborrhea of the T-zone (forehead, nose, chin).

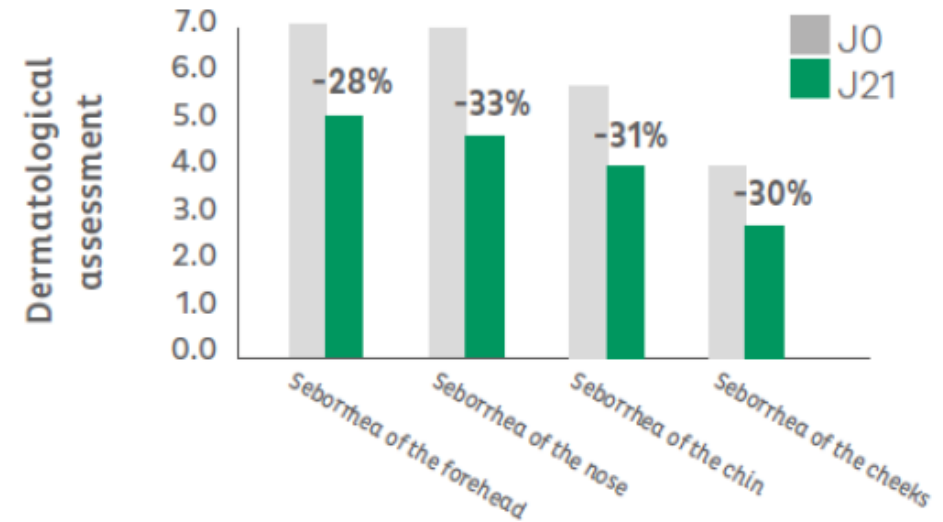

This lotion is thus recommended for greasy skin. After 3 weeks, the skin is clear and matte.

5 α Avocuta[®] is an original and patented ingredient obtained by esterification of Avocado Oil.

Plant esters which constitute **5 α Avocuta[®]** have the ability to strongly inhibit, in a low dose, **5 α reductase activity**.

During clinical studies, **5 α Avocuta[®]** has proven its ability to significantly reduce the level of sebum in skin and hair.

Clinical study on 23 individuals average 31 years old with a diffuse seborrhea on the face.

*Application of a cream containing 2% of **5 α Avocuta[®]** 2 times daily during 3 weeks.*
