BioLiFESCIENCE®

RAHN

AstaCos® OL50

Astaxanthin, the red diamond amongst antioxidants for natural skin balance. AstaCos® OL50 is a natural hightech cosmetic ingredient derived from microalga *H. pluvialis*, COSMOS certified, Natrue approved and 100% vegan. This extract with a high concentration of active molecules is mixed with organic jojoba oil to achieve a standardised astaxanthin concentration of 5%. *In-vivo* and *in-vitro* proven natural solution specifically designed for the cosmetics market.

MYRAMAZE®-ESSENCE

MYRAMAZE®-ESSENCE offers natural power from the resurrection plant *Myrothamnus flabellifolia*. Nature serves as a model, like the plant flourishes even after long periods of drought, so MYRAMAZE®-ESSENCE lightens up stressed mood and skin. It immediately calms down consumers in stressful situations. Five-fold effect leads to vital and radiant skin: 45% more radiance, reduced wrinkles and plump lips. *In-vivo* and *in-vitro* studies demonstrate the effectiveness of MYRAMAZE®-ESSENCE.
